

GEOMETRICAL SHAPES & SOLIDS

Intelli Kid: _____

POINT, LINE, PLANE AND SOLID

- A point has no dimensions, only position.
- A line is one dimensional. (One dimension only - length)
- A plane is two dimensional. (Two dimensions only - length & width)
- A solid is three dimensional. (Three dimensions only - length, width & height)

All 2D shapes are either polygons or non polygons.

POLYGONS

A polygon is a plane 2D shape with straight sides.

NON-POLYGONS

These 2D shapes have curves but no straight sides.

SHAPES

Every object around us has a shape. We see many objects with different boundaries which define their shape. Most commonly shapes are **2D** or **3D** shapes.

We see shapes in everyday life, some of them are:

CANDLES

SIGNALS

BALL

**OPEN
UMBRELLA**

CONE

LET US KNOW MORE ABOUT SHAPES

2D SHAPES

2 DIMENSIONAL SHAPES

Any shape that can be laid flat on a piece of paper is said to be a 2D shape. 2D shapes have only 2 dimensions, such as length and breadth, but no thickness.

EXAMPLES OF 2D SHAPES:

Square, Rectangle, Triangle, Pentagon, Circle.

Different 2D shapes have different number of sides and corners.

LOOK AT THE TABLE BELOW

I have 3 sides	I have 3 corners	I am a Triangle	
I have 4 equal sides	I have 4 corners	I am a Square	
I have 5 sides	I have 5 corners	I am a Pentagon	
I have 6 sides	I have 6 corners	I am a Hexagon	
I have 8 sides	I have 8 corners	I am an Octagon	
I have infinite sides	I have no corners	I am a Circle	

3D SHAPES

3 DIMENSIONAL SHAPES

Any shape that takes up space with three dimensions such as length, breadth and height is said to be a 3D shape.

FACES

Faces are the number of surfaces a shape has.

EDGES

Edges are the line segments where two faces meet.

VERTICES

Vertices are the points where 3 or more edges meet.

EXAMPLES OF 3D SHAPES:

Cube, Cuboid, Cylinder, Sphere, Cone, Square Pyramid, Triangular prism. All 3D shapes have different number of faces, edges and vertices.

SHAPES AND NETS

A flat 2D shape that can be rolled / folded into making a 3D shape is called net.

SHAPE

NET

EXERCISE

Intelli Pentos: Class-5
Geometrical Shapes & Solids

Q.1 Complete the table below:

NAME	SHAPE	FACES	EDGES	VERTICES	EXAMPLE
Cube		_____	12	8	
Cuboid		6	12	_____	
Square-based pyramid		_____	8	5	
Sphere		_____	0	0	
Cylinder		3	_____	_____	
Cone		_____	1	_____	
Triangular Prism		5	_____	6	

Q.2 Match the given images with names of shapes and their nets.

IMAGE	NET	EXAMPLE

QUESTIONS

Intelli Pentos: Class-5
Geometrical Shapes & Solids

Tick the correct option :

Q.1 I am a shape with 6 faces and 8 vertices, I am _____.

☐ Cube

☐ Cylinder

☐ Pyramid

☐ Cone

Q.2 I am a shape with 4 vertices and 4 equal sides,
I am a 2D shape, I am _____.

☐ Triangle

☐ Rectangle

☐ Square

☐ Circle

Q.3 The highlighted parts of the given figure represents a

☐ Vertices

☐ Edge

☐ Face

☐ Plane

Q.4 An example of a sphere would be a _____.

☐ Dice

☐ Cup

☐ Soccer Ball

☐ Mad Angles

Q.5 Which 3D shape has square faces only ?

☐ Cuboid

☐ Cube

☐ Prism

☐ Square

QUESTIONS

Intelli Pentos: Class-5
Geometrical Shapes & Solids

Q.6 This shape has 4 corners and 4 sides. Two of the sides are short and two of the sides are long. It is a 2D shape, which shape is it ?

☐ Square

☐ Circle

☐ Rectangle

☐ Triangle

Q.7 I am a shape on the face of a cube. Which shape am I ?

☐ Square

☐ Circle

☐ Rectangle

☐ Rectangle and Triangle

Q.8 The shape of a matchstick box is ?

☐ Cuboid

☐ Cube

☐ Prism

☐ Cylinder

Q.9 The shape of your capped pen is ?

☐ Cylinder

☐ Cone

☐ Cube

☐ Cuboid

Q.10 Which 3D shape can be formed from the given flat 2D shape (net) ?

☐ Cylinder

☐ Cuboid

☐ Cone

☐ Cube

QUESTIONS

Intelli Pentos: Class-5
Geometrical Shapes & Solids

Q.11 Which of the following shapes has curved surface ?

☐ Cone

☐ Cuboid

☐ Cube

☐ Prism

Q.12 Which two mathematical shapes could you combine to make this building ?

☐ Cone & sphere

☐ Cone & cylinder

☐ Cylinder & sphere

☐ Sphere & cone

Q.13 When two dice are joined, the new shape thus formed is ?

☐ Cube

☐ Cuboid

☐ Rectangle

☐ Pyramid

Q.14 When circular coins are placed one over the other, which shape would be formed?

☐ Cylinder

☐ Sphere

☐ Cone

☐ Circle

Q.15 When Krackjack biscuits are placed one over the other, then which shape is formed ?

☐ Cone

☐ Cuboid

☐ Cube

☐ Circle

QUESTIONS

Intelli Pentos: Class-5
Geometrical Shapes & Solids

Q.16 When Parle-G biscuits are placed one over the other, then which shape is formed ?

☐ Sphere

☐ Cube

☐ Cuboid

☐ Circle

Q.17 If two dusters are joined together side by side, then the new shape is

☐ Cube

☐ Cylinder

☐ Cuboid

☐ Prism

Q.18 I am a shape with 5 faces, 9 edges and 6 vertices, I am a 3D shape, I am _____.

☐ Triangular pyramid

☐ Square pyramid

☐ Triangular prism

☐ Cone

Q.19 When mad angles chips are placed one over the other, then which shape is formed ?

☐ Cone

☐ Cuboid

☐ Triangular prism

☐ Pyramid

Q.20 Identify the shape of the given image ?

☐ Cuboid

☐ Triangular prism

☐ Pyramid

☐ Cylinder
