I hear and I forget,
I see and I remember,
I do and I understand.

Confucius, Philosopher

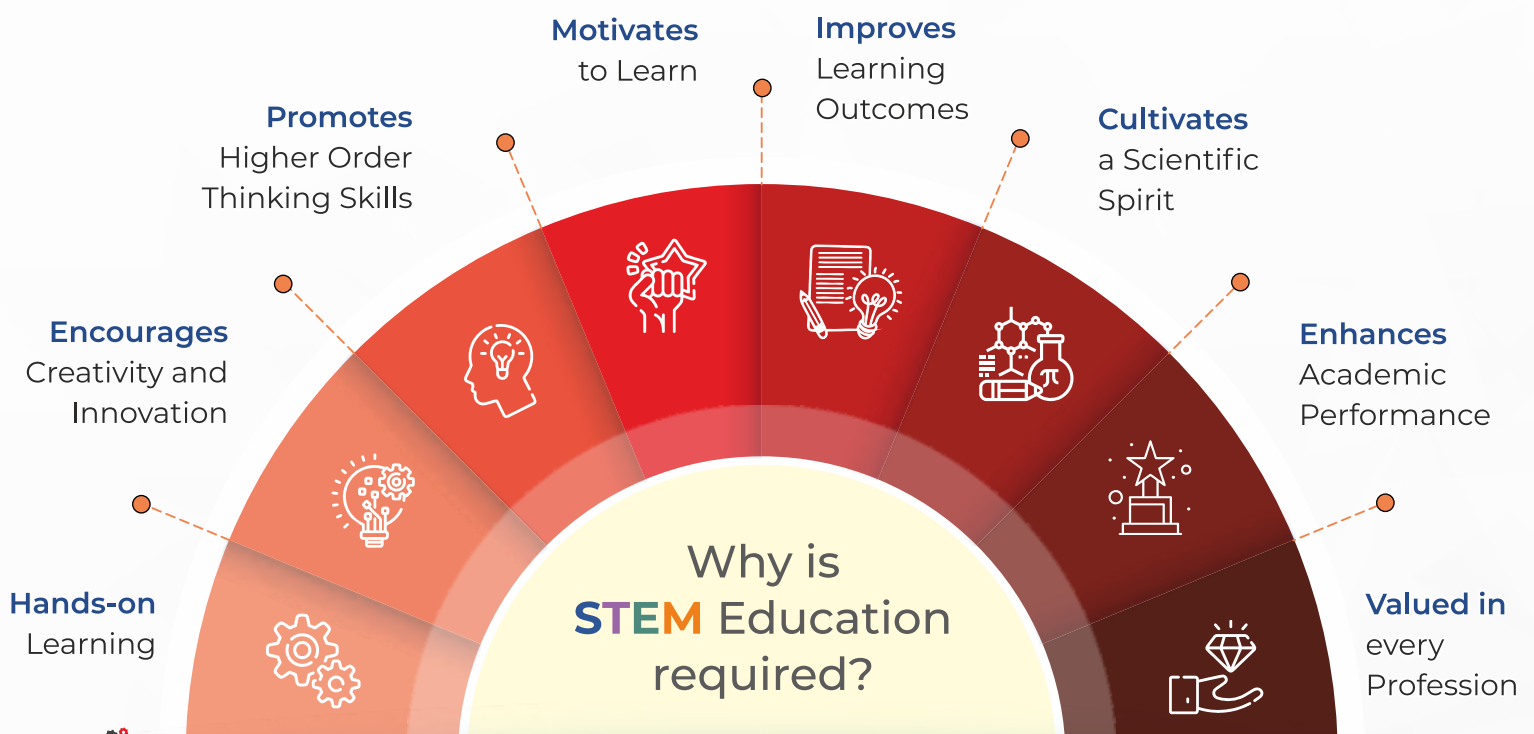

What is STEM?

National Science Foundation (NSF), United States introduced the acronym 'STEM' in 2001, standing for Science, Technology, Engineering & Maths.

STEM education entails training students in basic & advanced STEM concepts using a theoretical as well as practical approach.

STEM Education Methodology

STEM NEWS

Why STEM education is necessary in the Indian education sector

STEM education is the need of the hour to help students make the leap from users of technology to innovators

'STEM Education', known for its focus on Science, Technology, Engineering and Maths, is relatively a new term in the Indian education sector.

A robust STEM education creates critical thinkers, problem-solvers, and next generation innovators. Taking into consideration that India is one of the countries that produces the highest number of scientists and engineers, the growth of STEM has picked up significantly over the last few years.

Increasing demand

We are now at a stage where the number of STEM jobs are growing at a fast pace and currently outstripping the number of STEM graduates. According to the National Science Foundation, it is predicted that 80% of the jobs created in the next decade will require some form of math and science skills. Despite having the top quality talent, the exam-focused education model of the past has limited these students when it comes to innovation, problem-solving and creativity. This is where the STEM players come in to fill this gap.

STEM Education for Future Career Growth: More Essential Than Ever in the 2020's

80% IAS recruits in India belong to STEM

STEM is more fundamental and essential than ever. Back in 2001, the National Science Foundation introduced the acronym "STEM", standing for Science, Technology, Engineering, and Math. In the decades that followed, educators and schools adopted and expanded efforts to embrace STEM related education. Heading into the new decade, STEM has never been so vital for an education that will prepare students for their professional careers rather than simply building technical competencies within the classroom.

According to DRPFConsuls.com, the National Science Foundation estimates that 80 percent of the jobs available during the next decade will require math and science skills, therefore, young students need to be introduced to STEM education at an early age. While some institutions have embraced early STEM learning, consistent programming during the school day is not a widespread practice.

Survey: Most Young Kids Are Learning STEM at School

64% parents confirm link between STEM learning & Future Success

A survey of 1,000 parents of students aged 10 and younger found that 78% reported that their kids are learning STEM-based curricula at least weekly. And 73% of parents want schools to adopt more STEM learning. The findings were part of a fall 2021 parent survey administered by ed tech company codeSpark, which offers a game-based educational tool focused on STEM for grades K-5. The tool, codeSpark Academy, is free for public schools in North America. Almost two-thirds of parents participating in the survey (64%) also said they believe there's a direct correlation between STEM learning in the classroom and later career success. The survey also asked parents about student gaming habits and screen time. According to the survey, 70% of children 10 and under spend "at least" three to five hours per week "on apps and online games." And nearly half in that age range are comfortable using apps and online games by themselves.

STEM decides the future !

When
should **STEM**
education be
introduced ?
As Early as Possible

Why?
Because...

I understand
best
when I play.

I understand
best when I
see, touch &
do things.

I understand &
apply best
through hands-on
learning.

How
should **STEM**
education be
introduced?

Through Learning By Doing

Why?

Because we tend to remember...

80% of what we
Learn by Doing

10% of what we
Learn by Reading & Writing

STEM EDUTAINMENT

DIY Activity Box

Curriculum Mapping

The diverse activities in each box have been carefully mapped as per the grade-wise school curriculum.

Improved Understanding

It improves the knowledge, understanding, memory & application of educational concepts in kids.

Love For Learning

It creates an interest and love for life-long learning in kids.

STEM Edutainment is an integrated approach of learning **Science, Technology, Engineering & Mathematics** through a fine mix of education & entertainment.

Intelli SMART Box builds a positive attitude towards learning & inculcates the habit of seeking answers in a scientific manner. Learning while playing & experimenting keeps the kid involved & engaged. This greatly enhances learning outcomes.

What is inside an **Intelli SMART Box?**

How to use **Intelli** SMART Box?

01

READ ME FIRST FLYER

Study the guide-map.

02

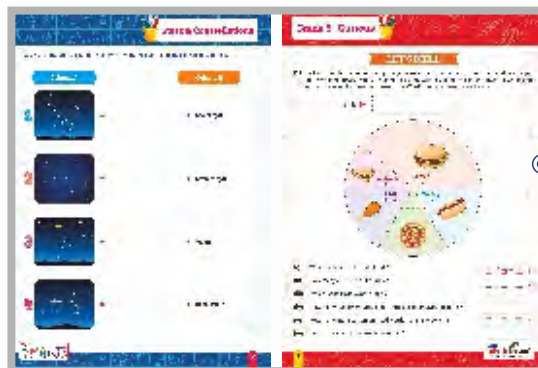

CONCEPT MANUALS

Understand, revise & practice the concepts.

FUN EXERCISES & QUIZ QUESTIONS

Test the knowledge gained.

05

DIY VIDEOS

Scan and gain free access to videos of Intelli experts performing the activities.

04

STEM ACTIVITIES

Build working models, perform scientific experiments, visualize Maths & Science, play amazing edutaining games.

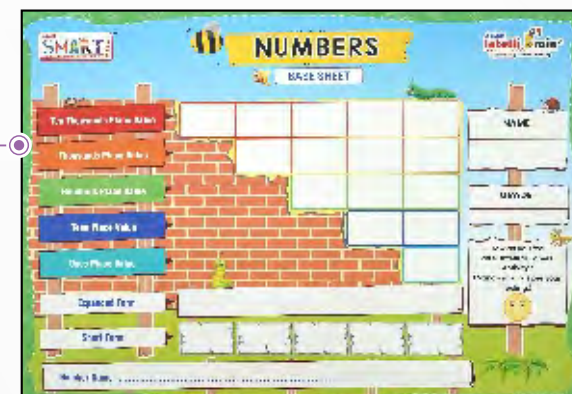

03

06

OBSERVATION & ANALYSIS

Consolidate the knowledge-observe, analyze & conclude.

07

LITTLE SCIENTIST VIDEOS

Apply the knowledge gained. Record a video & upload to share the achievement.

How does **Intelli SMART Box** benefit **KIDS**?

Enriches
Academic
Performance

Promotes

Time

What makes **Intelli SMART Box** the **BEST CHOICE**?

Based on the Government
of India's National
Education Policy, 2020

NEP
2020

Mapped with
age & grade-wise
school curriculum

Safe, eco-friendly &
reusable comprehensive
activity materials

Made in India by childhood
development & pedagogy
experts of ALLEN

Tested by students,
parents and eminent
academicians

Caters to multiple
learning behaviours

Real-life concepts related
to the world around us &
not just abstract concepts

Are you a
SCHOOL willing to
deliver the **BEST**
to the **students?**

Level up your
schooling with
Intelli SMART Lab

NEP
2020

Implement the Government of India's National Education Policy 2020 recommendations to enable experiential learning for students.

Gain from ALLEN CAREER INSTITUTE's 34 years of career building expertise and provide progressive STEM Edutainment to the students in keeping with the changing times.

Enhance the learning experience of students through practical application of theoretical concepts.

Improve the academic performance of the school brought about by better understanding, memory and performance of the students.

Witness your students emerge as confident winners in inter-school competitions and in life.
